BQA Seal of Recognition

Overview

A comprehensive and intensive theoretical and practical training-license program aimed to enhance the environmental practices for all technicians and engineers working in installing and maintaining Refrigeration and Air-Conditioning Units in Bahrain as well as eliminate mishandling of refrigerants, increase awareness, empower technicians and protect the environment and Ozone Layer.

Who should attend?

Engineers, or any type field of Project Managers and program Managers who are or will be involved in the areas of engineering, production, data processing, research and development, construction, corporate planning, finance and marketing. This course is of particular importance to engineers, executives, managers and supervisors in government and industry who are concerned with effectively managing ventures and projects where cost, schedule and performance of programs must meet rigid requirements.
